Early Age C'tis: Lizard Kings

Early Age C'tis one-page command brief

Early Age C'tis converts cold-blooded lizard infantry, chariots, sacred serpents, and accomplished Death-Nature mages into expansion, research, and strategic pressure. The pinned roster resolves 10 commander identities and 11 troop identities across ordinary, regional, coastal, and site-linked recruitment, plus 4 active nation-restricted spell records. Its chief planning risks are temperature, low defence, supply, poison use, and keeping expensive Sauromancers available for their competing jobs.

The safe operating plan is to keep recruitment geography visible, buy commanders for named jobs, label every random mage, connect research to casters already owned, and preserve a replacement route before committing elite or capital-limited troops. Exact expansion parties, scripts, formations, spell targets, freespawn composition, transformation results, and combat outcomes remain open unless a source below states them directly.

Early Age C'tis evidence and ruleset

This dossier covers unmodded Early Age C'tis on the Dominions 6.37 executable baseline. Player-facing rules are governed by the revision-2 official manual and official patches through 9 September 2026. Nation ID 27, roster memberships, unit fields, random masks, sites, spell restrictions, item links, and hero assignments are cross-checked against the pinned Inspector 6.35 commit `cfac4311bc0b58053b8dead7bffbfc036ba9bd5dc`.

The structured snapshot is not relabelled as live 6.37 data. The 6.37 patch's unspecified statistic corrections are not assigned to any C'tis object without a named official record. No runtime test, replay, save, or new test asset was used.

Early Age C'tis conversion chain

verified recruitment and national assets

-> provinces, forts, laboratories, temples, scouts, and replacement routes

-> labelled fixed and random path access

-> research, searching, forging, rituals, and battlefield support

-> surviving armies, sieges, claims, raids, and strategic depth

Early Age C'tis recruitment geography

Recruitment layer	Commanders	Troops	Evidence boundary
Ordinary forts	8	10	Direct pinned membership rows
Regional or coastal	0	0	Non-fort and coast membership rows; exact terrain availability remains source-dependent
Site-linked	2	1	Explicit site recruit fields; capital grouping follows the nation-site association

Empty ordinary rows do not prove that a nation lacks forces. Freespawn, reanimation, events, summoning, dominion effects, and special recruitment remain separate mechanisms.

Early Age C'tis commander roster

ID	Commander	Fixed and random magic	Leadership
169	Taskmaster	none	50
163	Commander of C'tis	none	75
162	Lizard Lord	none	100
160	High Priest of C'tis	H2	50
510	Hierodule	H1	0
170	Lizard Shaman	S1 N1	10
1387	Reborn	D2	10
161	Sauromancer	D3 N1; random: 100% x1 mask 14848 link 1; 10% x1 mask 14848 link 1	10
177	Lizard King	H3	150
1366	Lizard Heir	H1	100

Early Age C'tis troop roster

ID	Unit	HP	Protection	Morale	Traits
168	Militia	11	5	7	ordinary body
167	C'tissian Light Infantry	11	5	9	ordinary body
4062	C'tissian Medium Infantry	11	5	9	ordinary body
166	City Guard	11	5	9	ordinary body
165	C'tissian Heavy Infantry	11	5	9	ordinary body
504	Falchioneer	11	5	10	ordinary body
171	Slave Warrior	13	3	8	ordinary body
172	Elite Warrior	13	3	9	ordinary body
173	Runner	12	3	8	ordinary body
1365	Lizard Charioteer	13	5	11	ordinary body
783	Serpent Dancer	11	5	11	sacred

Early Age C'tis mage and priest portfolio

ID	Commander	Fixed and random magic	Leadership
160	High Priest of C'tis	H2	50
510	Hierodule	H1	0
170	Lizard Shaman	S1 N1	10
1387	Reborn	D2	10
161	Sauromancer	D3 N1; random: 100% x1 mask 14848 link 1; 10% x1 mask 14848 link 1	10
177	Lizard King	H3	150
1366	Lizard Heir	H1	100

The highest fixed recruitable paths resolved in these rows are Astral 1, Death 3, Nature 1, Holy 3. Random masks are printed as raw pinned fields because mask interpretation, linked-roll behaviour, and live display should not be guessed. A rare result is an opportunity after recruitment, never a guaranteed research or ritual schedule.

Early Age C'tis capital and national sites

ID	Site	Monthly fields	Recruits recorded
9	The Temple City	D4, N2	Lizard King, Lizard Heir, Serpent Dancer

Site rows prove only their explicit fields. Hidden effects, event behaviour, recruitment timing, ownership transitions, and live interface grouping remain unresolved.

Early Age C'tis national spell map

ID	Spell	School	Requirement	Cost field
318	Contact Scorpion Man	Conjuration 8	E1 F1	12
339	Sacred Crocodile	Conjuration 4	N2 W2	1
459	Summon Monster Toads	Conjuration 5	N2	5
460	Contact Couatl	Conjuration 7	N1 S1	40

Research does not create the caster, gems, slaves, corpses, laboratory, target, or free mage-turn. Every national spell remains a gated project: research, access, treasury, legal target, and opportunity cost must all be present.

Early Age C'tis national item boundary

ID	Item	Construction	Paths	Link
226	The Jade Mask	9	D6 N3	restricted

Restriction and rebate fields establish metadata links, not displayed prices, rounding, stacking, or live forge availability. Those remain open unless the official manual supplies the exact result.

Early Age C'tis hero boundary

ID	Hero record	Magic	Boundary
379	Lizard Hero	none	assignment only; timing unresolved
1660	Reassembled Prince	H2	assignment only; timing unresolved
1708	Consort of the Dead	S2 D4 N3	assignment only; timing unresolved
635	Ancient Shaman	S2 N2 H1	assignment only; timing unresolved

Heroes are contingent capacity. None belongs in an opening, research, or path plan that must work every game.

Early Age C'tis army identities

- Sacred roster: Serpent Dancer.
- Flying roster: no flying troop identified in the reconciled recruit rows.
- Aquatic or amphibious roster: no aquatic or amphibious troop identified in the reconciled recruit rows.
- Core identity: cold-blooded lizard infantry, chariots, sacred serpents, and accomplished Death-Nature mages.

These labels help assemble testable packages; they do not establish the best formation, script, bless, target, or casualty rate.

Early Age C'tis opening and expansion controls

- 1 Identify whether gold, resources, recruitment points, commander points, corpses, population, slaves, or a special national mechanism limits the first queue.
- 2 Separate ordinary, regional, coastal, and site-linked recruitment before planning reinforcement.
- 3 Use mundane leadership where it preserves a valuable mage-turn.
- 4 Label random mages immediately and keep rare paths out of guaranteed schedules.
- 5 Add scouts and retreat routes before extending beyond reliable information.
- 6 Record expansion results rather than publishing an untested party size.

Early Age C'tis fort and recruitment doctrine

Additional forts are valuable when they reproduce the commander or troop required by the next job. Regional and coastal recruitment must be evaluated where it exists rather than averaged into a fictional universal roster. Capital or site-linked units need a replacement ledger because their opportunity cost competes with every other capital-limited purchase.

For C'tis, the most likely planning failure is temperature, low defence, supply, poison use, and keeping expensive Sauromancers available for their competing jobs. The remedy is a visible queue showing location, bottleneck, expected role, and replacement time.

Early Age C'tis research response tree

- Fixed-path branch: begin with spells the repeatable mage roster can cast without a random, booster, hero, or Pretender.
- Random-path branch: open only after the qualifying mage is recruited and labelled.
- National-spell branch: verify the exact research level, caster, cost, target, and free mage-turn from the spell table.
- Construction branch: compare each forge turn against research, searching, ritual work, and army support; item metadata alone does not prove a discount.
- Summon or reanimation branch: account for gems, corpses, slaves, laboratory access, leadership, and unresolved arrival behaviour.

Early Age C'tis magic-access ladder

The fixed-path ceiling is Astral 1, Death 3, Nature 1, Holy 3. Access above that line needs a named bridge: booster, empowerment, communion or chorus where legal, summoned mage, hero, Pretender, or another directly verified source. Two partial paths on different commanders cannot be combined to cast one spell.

Early Age C'tis battlefield packages

Line and support package

Use the most replaceable suitable troops as frontage, place commanders according to actual leadership, and protect mages whose turns are needed for research or rituals. Armour, morale, fatigue, size, formation width, and the opponent decide whether the line survives.

Elite or sacred package

Use sacred or elite troops only when their recruitment location, bless, priest coverage, and replacement rate justify the commitment. Capital scarcity is a strategic cost even when the unit performs well.

Mobility or habitat package

Flying, stealthy, sailing, aquatic, amphibious, cave, forest, or wasteland tools must be checked against legal movement, supply, retreat, and reinforcement. A trait is not permission to ignore geography.

Mage package

Script from paths actually present on the recruited commanders. Keep gem use, fatigue, friendly fire, magic resistance, battlefield size, and enemy resistances visible; no generic script is treated as verified performance.

Early Age C'tis Pretender families

Family	What it can solve	What it cannot conceal
Missing-path bridge	Opens a named booster, ritual, or battlefield threshold	Research, gems, laboratories, and mage-turns remain required
Economy and infrastructure	Funds forts, laboratories, temples, commanders, and replacements	Gold does not create local resources, gems, corpses, slaves, or commander points
Sacred support	Improves a verified sacred package	Recruitment limits, priest coverage, and counters remain
Awake expansion body	Reduces pressure on the starting roster	Performance depends on settings, map, chassis, scales, script, and opponents
Resistance package	Covers a documented roster weakness	One resistance is not universal defence

Early Age C'tis matchup and failure matrix

Enemy problem	First answer to examine	Avoid
Massed light units	Replaceable width, area effects, morale pressure, and reserves	Spending every scarce elite turn on basic frontage
Heavy armour	Higher damage, armour-piercing or negating magic, fatigue, and buffs	Assuming ordinary weapons solve protection unaided
Accurate missiles	Screens, protection, spacing, speed, and disruption	Exposing commanders or fragile elites without guards
Elemental resistance	Shift damage type and use physical or fatigue pressure	Building the complete research plan around one element

Enemy problem	First answer to examine	Avoid
Fast raiders or flyers	Scouts, local leadership, layered defence, and mobile reserves	Concentrating every commander in one army
Large targets	Concentrated attacks, debuffs, control, and size-aware counters	Treating trampling or low-damage swarms as universal
Underwater or land transition	Verified amphibious access, coastal staging, summons, or allies	Assuming a habitat transition works because a related unit can cross

Early Age C'tis monthly audit

- Which recruitment layer supplies each current army and mage role?
- What is the active bottleneck at every fort?
- Are random mages labelled and excluded from guaranteed schedules until present?
- Does each research target have a legal caster and treasury?
- Are capital, coastal, regional, freespawn, and ordinary replacements tracked separately?
- Are scouts, laboratories, temples, leadership, supply, and retreat routes keeping pace?
- Are heroes excluded from plans that must work every game?
- Have uncertain mechanics remained marked as uncertain?

Early Age C'tis unresolved evidence boundary

The dossier does not claim exact expansion counts, formation performance, script outcomes, random-path display, freespawn or reanimation composition, special-dominion timing, transformation or mount resolution, summon arrival state, item-price stacking, hero timing, stealth detection, sailing routes, underwater transition, event outcomes, or battlefield casualty ranges. Nation-specific mechanics implied by names or summaries remain qualitative unless an explicit source field settles them. R-047, R-058, and every comparable engine-dependent investigation remain parked.

Early Age C'tis source note

- Dominions 6 Manual, revision 2: nation summary, visible roster, recruitment markings, national rules, and spell descriptions.
- Official Dominions patch history through 6.37: current executable chronology; generic 6.37 statistic fixes are not assigned to unnamed objects.
- Dominions 6 Data Inspector commit cfac4311bc0b58053b8dead7bfffbc036ba9bd5dc: nation ID, membership rows, unit fields, random masks, sites, spell restrictions, item links, and hero assignments.
- Strategy sections are bounded doctrine derived from verified capacity. They are not runtime test results.

Dossier source register

Official

- Dominions 6 Manual, revision 2: MA C'tis nation pages, Miasma, national rituals, forging, and fort construction.
- Illwinter official patch history through 6.36. No C'tis, Miasma, Marshmaster, Empoisoner, Sobek, or Jade Mask correction is inferred from a negative ledger search.

Structured snapshot

- Dominions 6 Data Inspector, commit cfac4311bc0b58053b8dead7bffb036ba9bd5dc, pinned to the 6.35 data update; used for nation identity, roster membership, random masks, capital sites, ritual restrictions, the Jade Mask restriction, and hero records.

Interpretation boundary

Roster entries, printed costs, paths, site income, ritual requirements, and pinned metadata are source facts. Openings, recruitment packages, research branches, force packages, Pretender families, and matchup responses are strategy. Exact Miasma income, disease checks, terrain conversion and hosting order, cold-blooded fatigue, summon forms, hero timing, assassination, and combat outcomes remain unresolved.
