Early Age Pangaea: Age of Revelry

Early Age Pangaea one-page command brief

Early Age Pangaea converts forest recruitment, plentiful revelers, centaurs and minotaurs, and strong Nature magic from the Panii into expansion, research, and strategic pressure. The pinned roster resolves 8 commander identities and 12 troop identities across ordinary, regional, coastal, and site-linked recruitment, plus 6 active nation-restricted spell records. Its chief planning risks are undisciplined troops, forest dependence, supply, blood-hunting opportunity cost, and protecting expensive mages.

The safe operating plan is to keep recruitment geography visible, buy commanders for named jobs, label every random mage, connect research to casters already owned, and preserve a replacement route before committing elite or capital-limited troops. Exact expansion parties, scripts, formations, spell targets, freespawn composition, transformation results, and combat outcomes remain open unless a source below states them directly.

Early Age Pangaea evidence and ruleset

This dossier covers unmodded Early Age Pangaea on the Dominions 6.37 executable baseline. Player-facing rules are governed by the revision-2 official manual and official patches through 9 September 2026. Nation ID 7, roster memberships, unit fields, random masks, sites, spell restrictions, item links, and hero assignments are cross-checked against the pinned Inspector 6.35 commit cfac4311bc0b58053b8dead7bfffbc036ba9bd5dc.

The structured snapshot is not relabelled as live 6.37 data. The 6.37 patch's unspecified statistic corrections are not assigned to any Pangaea object without a named official record. No runtime test, replay, save, or new test asset was used.

Early Age Pangaea conversion chain

verified recruitment and national assets
-> provinces, forts, laboratories, temples, scouts, and replacement routes
-> labelled fixed and random path access
-> research, searching, forging, rituals, and battlefield support
-> surviving armies, sieges, claims, raids, and strategic depth

Early Age Pangaea recruitment geography

Recruitment layer	Commanders	Troops	Evidence boundary
Ordinary forts	8	11	Direct pinned membership rows
Regional or coastal	0	0	Non-fort and coast membership rows; exact terrain availability remains source-dependent
Site-linked	0	1	Explicit site recruit fields; capital grouping follows the nation-site association

Empty ordinary rows do not prove that a nation lacks forces. Freespawn, reanimation, events, summoning, dominion effects, and special recruitment remain separate mechanisms.

Early Age Pangaea commander roster

ID	Commander	Fixed and random magic	Leadership
430	Black Harpy	none	10
2485	Satyr Commander	none	50
1534	Minotaur Lord	none	75
2158	Centauride Hierophantide	H1; random: 100% x1 mask 8704 link 1	50
231	Centaur Hierophant	H1; random: 100% x1 mask 9216 link 1	50
2187	Dryad	N1 G1 H2	50
2487	Dryad Mother	N2 G1 H2; random: 100% x1 mask 17920 link 1; 10% x1 mask 26112 link 1	50
1535	Pan	E1 N4 B1; random: 100% x1 mask 33792 link 1; 10% x1 mask 41984 link 1	100

Early Age Pangaea troop roster

ID	Unit	HP	Protection	Morale	Traits
239	Harpy	7	0	8	flying, stealthy
227	Satyr Sneak	12	1	9	stealthy
228	Satyr	12	1	9	stealthy
1532	Satyr Warrior	14	1	10	ordinary body
708	Reveler	15	2	12	stealthy
234	Minotaur	25	4	13	ordinary body
1533	Minotaur Warrior	27	4	14	ordinary body
2156	Centauride	18	3	11	stealthy
27	Centaur	20	3	11	stealthy
2157	Centauride Warrior	18	3	12	stealthy
1704	Centaur Warrior	22	3	12	stealthy
769	White Centaur	23	3	12	sacred, stealthy

Early Age Pangaea mage and priest portfolio

ID	Commander	Fixed and random magic	Leadership
2158	Centauride Hierophantide	H1; random: 100% x1 mask 8704 link 1	50
231	Centaur Hierophant	H1; random: 100% x1 mask 9216 link 1	50
2187	Dryad	N1 G1 H2	50
2487	Dryad Mother	N2 G1 H2; random: 100% x1 mask 17920 link 1; 10% x1 mask 26112 link 1	50
1535	Pan	E1 N4 B1; random: 100% x1 mask 33792 link 1; 10% x1 mask 41984 link 1	100

The highest fixed recruitable paths resolved in these rows are Earth 1, Nature 4, Glamour 1, Blood 1, Holy 2. Random masks are printed as raw pinned fields because mask interpretation, linked-roll

behaviour, and live display should not be guessed. A rare result is an opportunity after recruitment, never a guaranteed research or ritual schedule.

Early Age Pangaea capital and national sites

ID	Site	Monthly fields	Recruits recorded
118	The Grove of Gaia	N6	White Centaur

Site rows prove only their explicit fields. Hidden effects, event behaviour, recruitment timing, ownership transitions, and live interface grouping remain unresolved.

Early Age Pangaea national spell map

ID	Spell	School	Requirement	Cost field
253	Monster Boar	Conjuration 5	N3	10
274	Awaken Hamadryad	Enchantment 5	N4	25
337	Grow Fortress	Alteration 0	N4	35
424	Tune of Fear	Enchantment 0	N1	0
425	Tune of Growth	Enchantment 0	N1	0
426	Tune of Dancing Death	Enchantment 0	N1	0

Research does not create the caster, gems, slaves, corpses, laboratory, target, or free mage-turn. Every national spell remains a gated project: research, access, treasury, legal target, and opportunity cost must all be present.

Early Age Pangaea national item boundary

ID	Item	Construction	Paths	Link
38	Thorn Spear	3	N1	rebate
39	Thorn Staff	3	N1	rebate

Restriction and rebate fields establish metadata links, not displayed prices, rounding, stacking, or live forge availability. Those remain open unless the official manual supplies the exact result.

Early Age Pangaea hero boundary

ID	Hero record	Magic	Boundary
540	White Minotaur	H2	assignment only; timing unresolved
614	Harpy Queen	A2 N2	assignment only; timing unresolved
2246	Blessed Couple	W1 E1 D1 N3 H2	assignment only; timing unresolved

Heroes are contingent capacity. None belongs in an opening, research, or path plan that must work every game.

Early Age Pangaea army identities

- Sacred roster: White Centaur.
- Flying roster: Harpy.
- Aquatic or amphibious roster: no aquatic or amphibious troop identified in the reconciled recruit rows.
- Core identity: forest recruitment, plentiful revelers, centaurs and minotaurs, and strong Nature magic from the Panii.

These labels help assemble testable packages; they do not establish the best formation, script, bless, target, or casualty rate.

Early Age Pangaea opening and expansion controls

- 1 Identify whether gold, resources, recruitment points, commander points, corpses, population, slaves, or a special national mechanism limits the first queue.
- 2 Separate ordinary, regional, coastal, and site-linked recruitment before planning reinforcement.
- 3 Use mundane leadership where it preserves a valuable mage-turn.
- 4 Label random mages immediately and keep rare paths out of guaranteed schedules.
- 5 Add scouts and retreat routes before extending beyond reliable information.
- 6 Record expansion results rather than publishing an untested party size.

Early Age Pangaea fort and recruitment doctrine

Additional forts are valuable when they reproduce the commander or troop required by the next job. Regional and coastal recruitment must be evaluated where it exists rather than averaged into a fictional universal roster. Capital or site-linked units need a replacement ledger because their opportunity cost competes with every other capital-limited purchase.

For Pangaea, the most likely planning failure is undisciplined troops, forest dependence, supply, blood-hunting opportunity cost, and protecting expensive mages. The remedy is a visible queue showing location, bottleneck, expected role, and replacement time.

Early Age Pangaea research response tree

- Fixed-path branch: begin with spells the repeatable mage roster can cast without a random, booster, hero, or Pretender.
- Random-path branch: open only after the qualifying mage is recruited and labelled.
- National-spell branch: verify the exact research level, caster, cost, target, and free mage-turn from the spell table.
- Construction branch: compare each forge turn against research, searching, ritual work, and army support; item metadata alone does not prove a discount.
- Summon or reanimation branch: account for gems, corpses, slaves, laboratory access, leadership, and unresolved arrival behaviour.

Early Age Pangaea magic-access ladder

The fixed-path ceiling is Earth 1, Nature 4, Glamour 1, Blood 1, Holy 2. Access above that line needs a named bridge: booster, empowerment, communion or chorus where legal, summoned mage, hero, Pretender, or another directly verified source. Two partial paths on different commanders cannot be combined to cast one spell.

Early Age Pangaea battlefield packages

Line and support package

Use the most replaceable suitable troops as frontage, place commanders according to actual leadership, and protect mages whose turns are needed for research or rituals. Armour, morale, fatigue, size, formation width, and the opponent decide whether the line survives.

Elite or sacred package

Use sacred or elite troops only when their recruitment location, bless, priest coverage, and replacement rate justify the commitment. Capital scarcity is a strategic cost even when the unit performs well.

Mobility or habitat package

Flying, stealthy, sailing, aquatic, amphibious, cave, forest, or wasteland tools must be checked against legal movement, supply, retreat, and reinforcement. A trait is not permission to ignore geography.

Mage package

Script from paths actually present on the recruited commanders. Keep gem use, fatigue, friendly fire, magic resistance, battlefield size, and enemy resistances visible; no generic script is treated as verified performance.

Early Age Pangaea Pretender families

Family	What it can solve	What it cannot conceal
Missing-path bridge	Opens a named booster, ritual, or battlefield threshold	Research, gems, laboratories, and mage-turns remain required
Economy and infrastructure	Funds forts, laboratories, temples, commanders, and replacements	Gold does not create local resources, gems, corpses, slaves, or commander points
Sacred support	Improves a verified sacred package	Recruitment limits, priest coverage, and counters remain
Awake expansion body	Reduces pressure on the starting roster	Performance depends on settings, map, chassis, scales, script, and opponents
Resistance package	Covers a documented roster weakness	One resistance is not universal defence

Early Age Pangaea matchup and failure matrix

Enemy problem	First answer to examine	Avoid
Massed light units	Replaceable width, area effects, morale pressure, and reserves	Spending every scarce elite turn on basic frontage
Heavy armour	Higher damage, armour-piercing or negating magic, fatigue, and buffs	Assuming ordinary weapons solve protection unaided
Accurate missiles	Screens, protection, spacing, speed, and disruption	Exposing commanders or fragile elites without guards
Elemental resistance	Shift damage type and use physical or fatigue pressure	Building the complete research plan around one element

Enemy problem	First answer to examine	Avoid
Fast raiders or flyers	Scouts, local leadership, layered defence, and mobile reserves	Concentrating every commander in one army
Large targets	Concentrated attacks, debuffs, control, and size-aware counters	Treating trampling or low-damage swarms as universal
Underwater or land transition	Verified amphibious access, coastal staging, summons, or allies	Assuming a habitat transition works because a related unit can cross

Early Age Pangaea monthly audit

- Which recruitment layer supplies each current army and mage role?
- What is the active bottleneck at every fort?
- Are random mages labelled and excluded from guaranteed schedules until present?
- Does each research target have a legal caster and treasury?
- Are capital, coastal, regional, freespawn, and ordinary replacements tracked separately?
- Are scouts, laboratories, temples, leadership, supply, and retreat routes keeping pace?
- Are heroes excluded from plans that must work every game?
- Have uncertain mechanics remained marked as uncertain?

Early Age Pangaea unresolved evidence boundary

The dossier does not claim exact expansion counts, formation performance, script outcomes, random-path display, freespawn or reanimation composition, special-dominion timing, transformation or mount resolution, summon arrival state, item-price stacking, hero timing, stealth detection, sailing routes, underwater transition, event outcomes, or battlefield casualty ranges. Nation-specific mechanics implied by names or summaries remain qualitative unless an explicit source field settles them. R-047, R-058, and every comparable engine-dependent investigation remain parked.

Early Age Pangaea source note

- Dominions 6 Manual, revision 2: nation summary, visible roster, recruitment markings, national rules, and spell descriptions.
- Official Dominions patch history through 6.37: current executable chronology; generic 6.37 statistic fixes are not assigned to unnamed objects.
- Dominions 6 Data Inspector commit cfac4311bc0b58053b8dead7bfffbc036ba9bd5dc: nation ID, membership rows, unit fields, random masks, sites, spell restrictions, item links, and hero assignments.
- Strategy sections are bounded doctrine derived from verified capacity. They are not runtime test results.

Dossier source register

Official

- Dominions 6 Manual, revision 2: MA Pangaea nation pages, Magical Tunes, national rituals, forging, and fort construction.
- Illwinter official patch history through 6.36. No Pangaea, Pandemoniac, Hamadryad, Monster Boar, Fort of the Ancients, or national Tune correction is inferred from a negative ledger search.

Structured snapshot

- Dominions 6 Data Inspector, commit cfac4311bc0b58053b8dead7bfffbc036ba9bd5dc, pinned to the 6.35 data update; used for nation identity, fort and forest recruitment, random masks, capital sites, spell restrictions, item-field boundaries, and hero records.

Interpretation boundary

Roster entries, printed costs, paths, site income, spell and ritual requirements, and pinned metadata are source facts. Openings, recruitment packages, research branches, force packages, Pretender families, and matchup responses are strategy. Recuperation timing, forest-interface behaviour, stealth and patrol results, Tune resolution, ritual implementation, hero timing, and combat outcomes remain unresolved.
